

**Classification**

Stackable Seminar chair

**A.1. Technical Data**

A.1.1. The frame of the chair is made of steel rod with a round cross-section of 11 mm diameter, suitably bent and welded.

A.1.2. The frame is chrome-plated. On the bottom there are 4 anti-skid gliders made die-casted thermoplastic material.

A.1.3. The seat and backrest of the chair are made of injection molded plastic (PP) and are clipped on the chair frame. The seat has a protective cover on the bottom side for better appearance and stacking ability.

A.1.4. The seat and backrest have upholstered cushions made of 20 mm thick expanded polyurethane foam, according to the corresponding DROMEAS brochures.

A.1.5. Through special plastic connecting elements which are fixed to the frame, it is possible to connect chairs next to each other and form rows.

A.1.6. The chairs are stackable
