## ERMIS

---

### Frame

The back and seat consist of a steel welded metal frame, lined with upholstery.

### Base

The 5-star base of the chair has a diameter of 660 mm and is made of die-cast aluminium. It has twin castors made from reinforced polyamide. The twin castors can be replaced with stoppers.

### Mechanism

The mechanism of the seat is made of cast aluminium in combination with plastic and has a system with which the reclining of the seat by 7° is achieved and, accordingly, its stabilization

### Height adjustment

Chair height adjustment is achieved by means of a gas piston, which is activated by a lever located below and to the side of the seat
